

The image shows a brown bear standing in a forest. The bear is the central focus, looking towards the camera. The forest is dense with tall, thin trees and green foliage. The lighting is soft, suggesting a misty or overcast day. Overlaid on the upper part of the image is the Finn-Bois logo, which consists of the words "FINN-BOIS" in a bold, white, sans-serif font. Behind the text are several vertical, white, jagged lines that resemble scratches or stylized tree trunks.

FINN-BOIS

Flexible and dynamic log house manufacturer

The forests of the north are the home of the bear. The bear knows all about its surroundings, and makes good use of them in a natural way. The Finnish company Finn-Bois knows all about building log houses and has the skill to process the slow-growing timber of the north into strong, durable log houses and holiday homes. We are an innovative contract manufacturer, and are thus familiar with the forest and able to sense which way its winds are blowing. Finn-Bois is a reliable partner that is prepared to fulfil customer-specific requirements and is not afraid of last minute changes.

Know-how and the manufacturing process give competitive edge

The technologically sophisticated log houses made by Finn-Bois are created from carefully selected pinewood by means of fully-automated manufacturing technology that makes use of most of the home design software programs available. The manufacturing process is extremely cost-effective and flexible. It enables customised structural solutions and rapid changes in the range of products. Finn-Bois follows strict quality control criteria throughout the manufacturing process – from the raw materials to the erection of the building. Every member of our staff is totally committed to high-quality work.

Our ethos is a first-rate service chain

The goal of Finn-Bois is to establish high-quality long-term cooperation with our partners and to ensure satisfied end-customers. Our operating principles include cost-effective manufacture and competitive prices. Our efficient organisation consists of experienced professionals who in conjunction with our partners handle turnkey deliveries, covering everything from the planning to the erection of the building. Our cooperation network is at your service – proficient specialists act as equal partners and are able to offer benefits that you will not find elsewhere.
